Cartoon Town and City

Created & imported into unity by Richard Lester

Features:

1. Low Polly, verts range from less than 2000 downs to 18 with an average of 200 to 300 verts.
2. Custom materials including outlines, animated water.
3. All modes are setup as prefabs, just drag and drop.
4. Modular, all pieces snap together for easy world-building.
5. Trees and bushes have 3 LODs.
6. Buildings and Lamps have emission maps.
7. All materials except for leaves are 2048 x 2048 resolution.

Prefabs:

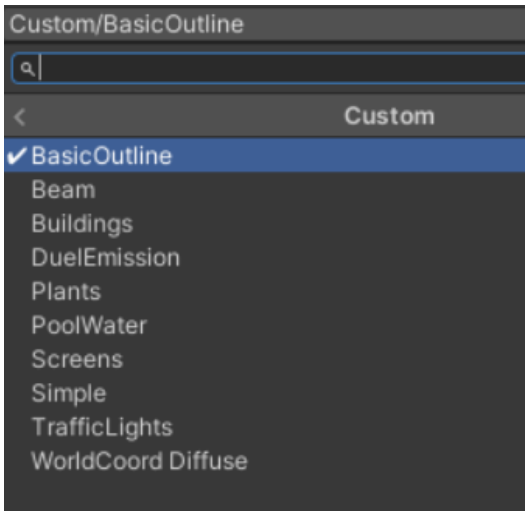

All prefabs have a LOD system setup, you will need to adjust the camera distances to your needs.

Materials:

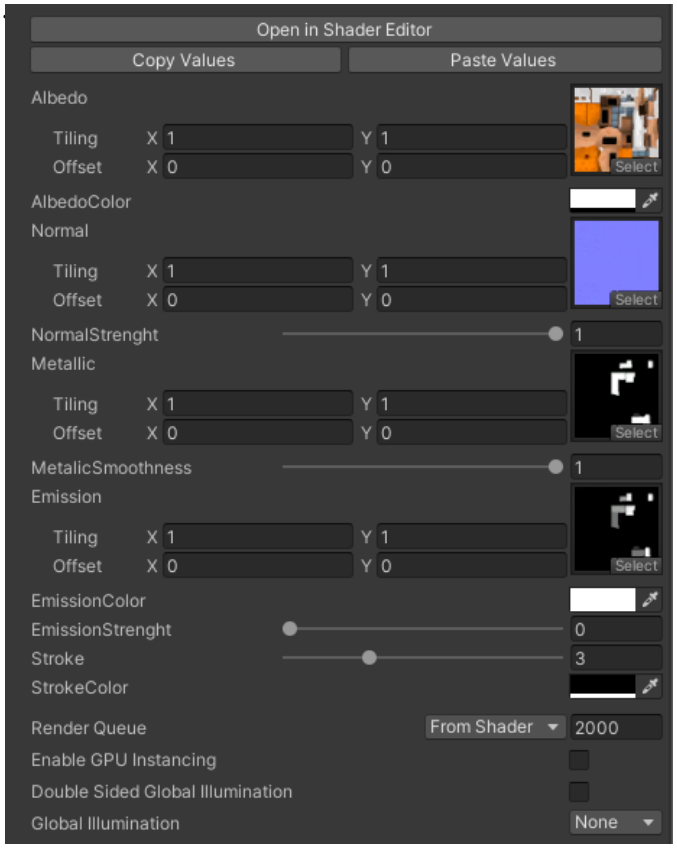

Materials contain 2048 x 2048 maps, including Albedo, Metallic, Normal and Emission. Please contact me if you require larger maps. The normals are baked from high poly meshes.

Custom Shaders:

Custom materials have been created for all models and can be found under the Custom section when selecting a shader type.

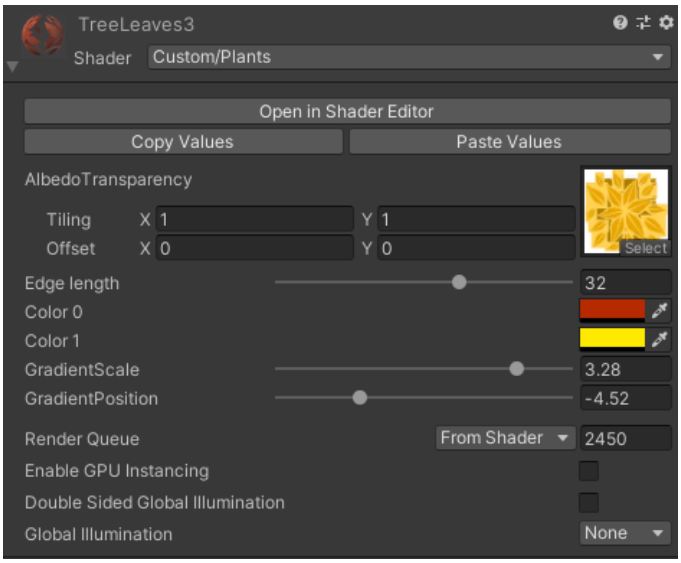

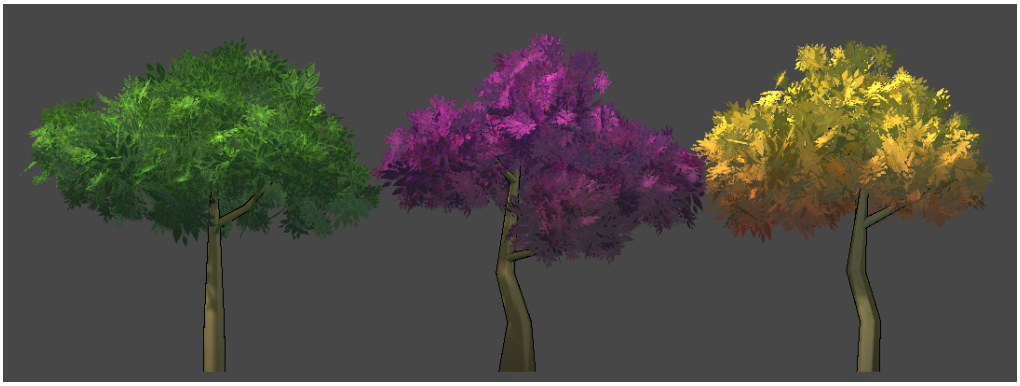

Basic Outline: Used for most materials

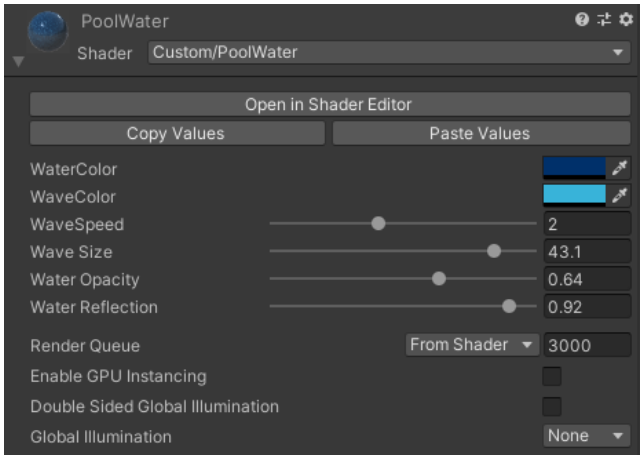

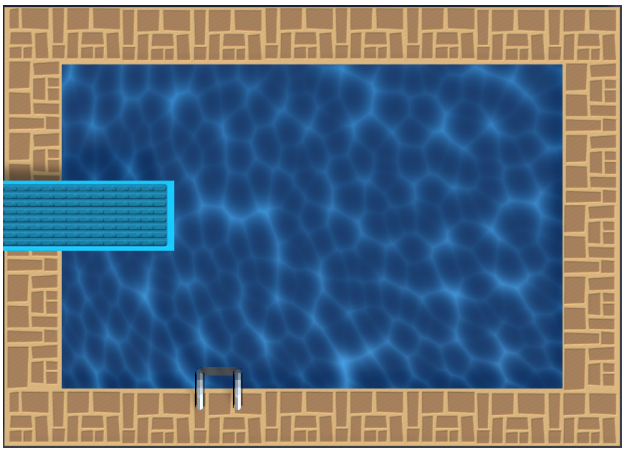

Leaves: Allows for color gradients in leaves and foliage

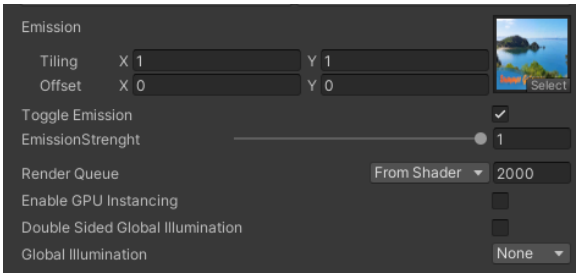

Pool Water: Used to create animated water

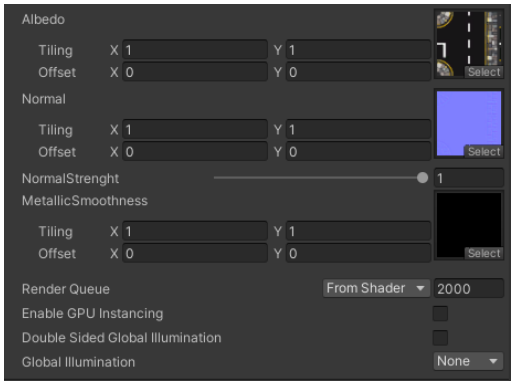

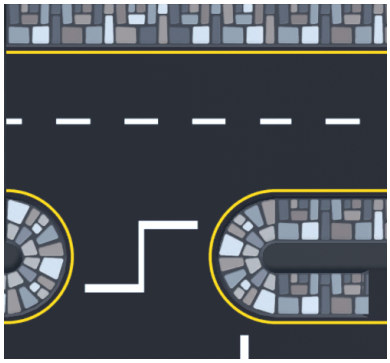

Screens: Emission shader used for advertising screens

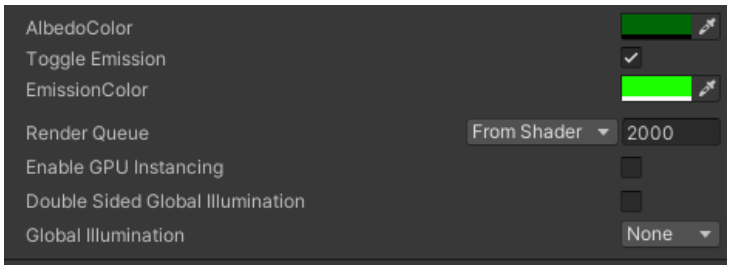

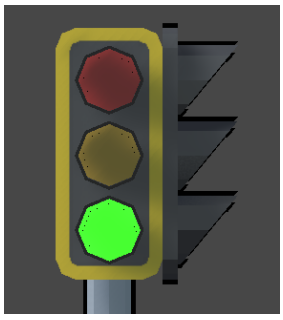

Simple: This shader doesn't have an outline

Traffic Lights: Emission shader for traffic lights

You do not have the right to sell or distribute the models, contents or package separate of your final Unity game or Unity application.
